Affordable Properties :: Teddi Segal :: Website Design

I recently completed work on Teddi Segal's personal Real Estate website. With the booming Real Estate market Teddi decided to take a career path which included becoming a licensed broker in Miami.

The work on her site included the set-up and creation of the website based on another designers vision which they provided to me in a pdf format. The end result was quickly launched within budget and on-time.

Teddi and I have worked together over the years on several projects. As you will find out by reading her bio [disbaled].
